

 NEXT-GEN GOVERNANCE

The Future of AI Governance

Beyond filtering. Beyond blocking.
Dynamic real-time interaction management for the modern AI-
ready classroom.

 ZERO LATENCY

 CIPA COMPLIANT

Intelligent Digital Classroom Governance

IMTLazarus integrates protection, contextual security, visibility, and AI governance for the modern classroom.

Granular Filtering

Blocks inappropriate content across the web, YouTube, and search engines.

Technology Agnostic

Works natively on Chromebook, Windows, iOS, and Android.

Real-Time Visibility

Complete, immediate monitoring of all classroom activity.

Behavior & Risk

Detects distractions, misuse, and risk patterns instantly.

NEW

AI Governance

Proactively protects sensitive data and guides AI interactions, ensuring regulatory compliance and meaningful learning.

+900 educational institutions • 32 countries • 98% renewal rate

THE CHALLENGE

The Generative Disruption

45%

**Class time currently lost to digital
distractions.**

Legacy DNS filters (GoGuardian, Securly) are failing. They manage URLs, but they are blind to what happens inside the AI prompt.

THE ENGINE

Real-Time DOM Injection

We don't sit on the network; we sit inside the page. By modifying in-page code in real-time, we govern the entire AI interaction ecosystem natively.

Dynamic Protection

Where standard filters stop, we begin. Total control over UI elements, buttons, and text fields within ChatGPT, Claude, and Gemini.

Unbreakable Anti-Cheat

Clipboard Kill

Students cannot copy-paste exams or prompts. Manual transcription forces cognitive engagement and reading comprehension.

Media Blindness

Image upload and microphone buttons are hidden. Students cannot solve homework with a single photo.

Real-Time DLP

Personally Identifiable Information (PII) is masked into asterisks (****) before data ever leaves the device.

PEDAGOGICAL GUARDRAILS

The Socratic Tutor

Turn AI from a "shortcut" into a mentor. We inject hidden instructions forcing the AI to provide pedagogical hints instead of direct answers.

"What is the capital of France?"

"Think about the country's history. It's often called 'The City of Light'..."

GAMIFICATION

The Credit Economy

Infinite access leads to intellectual laziness. We teach scarcity and critical thinking by limiting AI queries per session.

Prompt Budgets

Students receive a set number of queries (e.g., 10), forcing them to refine their prompts and think before they type.

360° Real-Time Auditing

Semantic Alerts

Real-time analysis flags risks (bullying, self-harm) instantly on the teacher's dashboard. Immediate remote intervention possible.

Forensic Persistence

1-year data retention of mandated logs without astronomical storage fees. Full KOSA and CIPA compliance out of the box.

UNIVERSAL INTEROPERABILITY

Total Agnostic Coverage

CHROMEOS

IPADOS

WINDOWS 11

ANDROID

Works natively across all major operating systems with zero latency. One dashboard. One unified safety narrative.
