

EndNote 2025

Increase research productivity and streamline collaboration with the leading features of EndNote

Why EndNote over free tools?

Centralized reference management

One unified library that eliminates fragmentation and improves research workflows.

Secure & compliant

Enterprise-grade data protection with appropriate legal agreements, ensuring security and compliance.

Trusted by leading organizations

Widely adopted by top institutions and companies worldwide.

Top choice for systematic reviews

Highly rated and widely used for managing systematic reviews globally.

Responsive 24/7 Support

Dedicated technical support available around the clock for subscribers.

Boost productivity & research impact

Streamlined collaboration

Share a single library across large research teams and groups.

Faster academic writing

- Insert citations and generate bibliographies effortlessly.
- Manage references with the best-in-class Cite While You Write plug-in.
- Reformat manuscripts in 7,000+ citation styles or create custom styles.

Smarter publishing decisions for research integrity

- Identify the best-fit journals for your manuscript with Manuscript Matcher.
- Stay informed about retracted publications with Retraction Alerts.

Training and enablement

Structured onboarding & ongoing support

Live onboarding and continuous training covering basic to advanced use cases.

Researcher-focused enablement

Practical guidance designed to help researchers adopt EndNote efficiently and use it with confidence.

Built for libraries & institutions

Library-first integrations

Seamless integration with Web of Science and ProQuest platforms.

Discovery & library systems compatibility

Effortless export from discovery services including Summon, Alma, Primo, and Leganto.

Broad database coverage

Direct import from hundreds of research databases to support institutional workflows.

Supporting researchers and libraries at scale – from citation to collaboration.
