

Network Security and Performance With No Blind Spots.

See every bit, byte & packet with Garland Technology's Network TAPs, Network Packet Brokers, Hardware Data Diodes, and Inline Bypass Solutions.

EXPLORE SOLUTIONS

Gain real-time insights, improve security defenses, and ensure compliance with complete network visibility across IT, OT, and cloud environments.

PARTNER WITH US

Build stronger security solutions with a trusted manufacturer who provides the physical connection for security, monitoring, and analysis tools.

NO HIDDEN FEES

No subscriptions, licenses, or fees - ever.

MADE IN THE USA

Designed and manufactured to the highest standards.

TAILORED SOLUTIONS

TAP to Tool™ ensures seamless integration with your security and network performance tools.

Unmatched Solutions for 100% Clear Network Visibility and Strong Security

100% network traffic visibility powers your most important operational goals.

NETWORK SECURITY

See every packet, detect every anomaly, and shut down threats without stopping production.

OT/ICS NETWORK

Secure and monitor operational technology and industrial control systems environments with complete network visibility and no downtime.

NETWORK PERFORMANCE

Optimize network efficiency with uninterrupted traffic monitoring and faster issue resolution.

CLOUD VISIBILITY

Monitor simple to complex cloud environments with full traffic insight, enhancing security and performance.

COMPLIANCE

Efficiently meet compliance requirements with full network visibility and audit-ready reporting.

STACK OR TOOL COMPATIBILITY

Quickly and easily integrate Garland solutions with existing network security and monitoring tools.

Enable Security & Performance In Every Industry

Garland Technology solutions support every industry's network traffic visibility needs, no matter how unique the challenges.

CRITICAL INFRASTRUCTURE

Prevent cyberattacks, reduce complexity, and ensure uninterrupted uptime for critical operations.

BANKING & FINANCIAL SERVICES

Enhance financial transaction security, reduce latency, and simplify compliance with real-time network visibility.

GOVERNMENT & DEFENSE NETWORKS

Defend mission-critical federal, state and local operations with real-time threat detection and full network control.

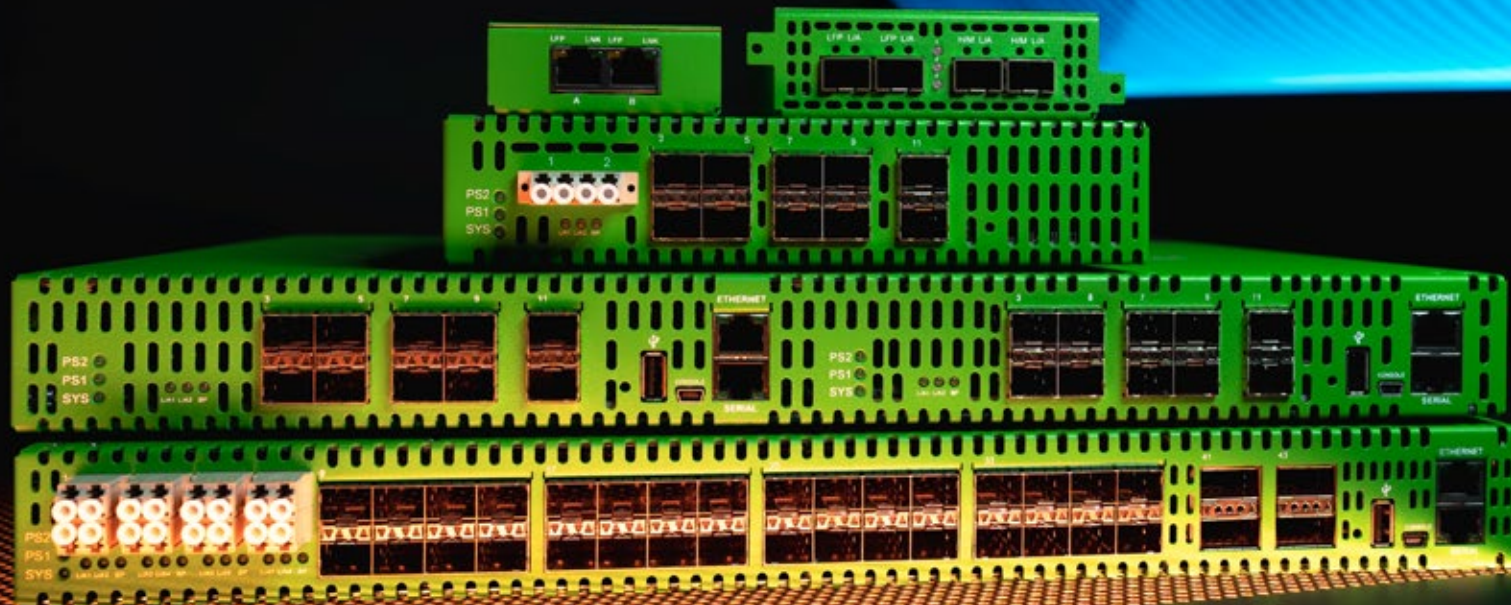

HEALTHCARE

Ensure HIPAA compliance, enable security and medical device monitoring, and maintain operational continuity in healthcare environments.

MSSP SECURITY

Unmatched solutions for reliable network security services by maximizing threat visibility, better protecting client networks.

GARLAND TECHNOLOGY PRODUCT LINES

NETWORK TAPS

- Portable, Half-U, Modular
- 10/100/1000M, 1G, 10G, 25G, 40G, 100G, 400G
- 100Base-FX, 100Base-LX
- Data Diode
- Extreme Temperature
- Military-grade TAPs
- DC Power
- DIN Rail Mounts
- Power Locks
- PCIe TAPs

PACKET BROKERS

- Half-U, 1U, 2U
- 10/100/1000M, 1G, 10G, 25G, 40G, 100G
- Extreme Temperature
- Fly-away Kit Packet Brokers with less than 13" depth

HARDWARE DATA DIODE

- Data Diode TAPs
- Data Diode for SPAN inputs

INLINE BYPASS

- Bypass TAPs
- EdgeLens Focus Inline Packet Brokers - 1/2U
- EdgeLens Inline Packet Brokers 1G, 10G, 40G, 100G
