

GoGuardian gives educators complete visibility, reporting, and control over how student device time is spent.

The only platform that helps districts measure, understand, and actively manage student screen time through reporting, policy setting, and real-time classroom control.

GoGuardian Admin™

Centralized visibility and control over student screen time, enabling compliance reporting, parent transparency, and policy enforcement.

- **Reporting** tracks total device usage across the district
- **Categorization** helps improve screen value by distinguishing educational vs. non-educational usage
- **Policy controls** enforce time-based and content-based usage rules

Coming Back to School '26

- **Screen Time Parent Reporting** – generate individualized student screen time summaries
- **Screen Time Leadership Insights** – export board-ready reports with key metrics and breakdowns

GoGuardian Discover™

Deep, actionable insights into screen time and screen value, helping you optimize technology usage and demonstrate impact.

- **Deep reporting** helps analyze usage by school, grade, or student and compare active and passive usage
- **App Intelligence** provides actionable insights on app licenses, costs, usage, compliance, and ROI
- **Segmentation filters** allow you to drill down by OU, campus, classroom, and individual user

Coming Back to School '26

- **Benchmarking** – compare your data to other schools, districts, or state targets

GoGuardian Teacher™

Actively manage student screen time in the classroom to keep students engaged, on-task, and learning effectively.

- **Classroom screen monitoring** offers real-time visibility into student screens
- **Off-task alerts** notify you when students are on non-instructional sites
- **Session controls** limit access to unapproved websites or apps during instruction
- **Screen redirect** guides students to specific content and minimize distractions
