- Begin by registering for your access to our online self-paced introductory training on DNSFilter and earn \$100 cash when completed. It takes only 45 minutes, and you will be well on your way to earning even more cash! [Register for the training today!](#)
- Once you've been introduced to essential protective DNS services, you'll be able to quickly uncover where "7th layer" vulnerabilities may exist within your client's security stack. The majority of cyber threats begin with a simple web request. DNSFilter steps in right there, at the earliest stage, by scrutinizing and filtering web traffic. This is crucial in protecting businesses from malware, phishing, and other cyber threats, while also enforcing web content policies.
- As you determine your customers need to explore further, register the lead to secure your 30% margin discount and a DNSFilter Account Executive will connect with you to further qualify the opportunity and together help drive it closure. [Register your potential deals here!](#) Be sure to bookmark the form for quick access as new opportunities arise.
- Cash rewards are earned in the month the qualifying stage is attained and are paid out by the end of the following month. Recipients must be in a sales or pre-sales engineer role to qualify.
- Cash payments are made through the global payment platform, [XTRM](#). Be sure to visit the site and enroll with your Personal account to easily transfer cash to your bank account, debit card, check, or virtual credit card.
- **Promotion begins July 1, 2024, and ends December 31, 2024.** DNSFilter reserves the right to disqualify a transaction and/or end the promotion without written notice.

ABOUT DNSFILTER

Empowering Your Clients

Valued partners of DNSFilter understand the importance of protecting your clients' businesses from cyber threats. That's where we come in.

What is DNSFilter?

DNSFilter is a cloud-based DNS security platform designed to safeguard your clients' networks and devices from malware, phishing attacks, and other online threats. Our solution leverages AI-powered threat intelligence, a vast global network of DNS servers to resolve query traffic fast, with setup in under an hour.

Benefits for Your Clients:

- **Public Wi-Fi Safety:** Protect your clients' public Wi-Fi networks and endpoints from Child Sexual Abuse Material (CSAM) concerns with our Internet Watch Foundation (IWF) and Project Arachnid category.
- **Enhanced EDR Capabilities:** Fill the gaps in your existing Endpoint Detection and Response (EDR) solutions with DNSFilter's protective DNS filtering, complementing top-tier EDRs like CrowdStrike and Sentinel.
- **Phishing Training Isn't Enough:** Supplement phishing training programs, ensuring end users are protected from sophisticated threats even when they do click.
- **SIEM and SOC Visibility:** Enhance your clients' threat visibility by streaming invaluable real-time DNS query data into SIEM and SOC tools they already use.

DNSFilter offers an advanced DNS security platform that will address critical gaps in your clients' security posture.

Ready to Take Your Clients' DNS Security to the Next Level?
