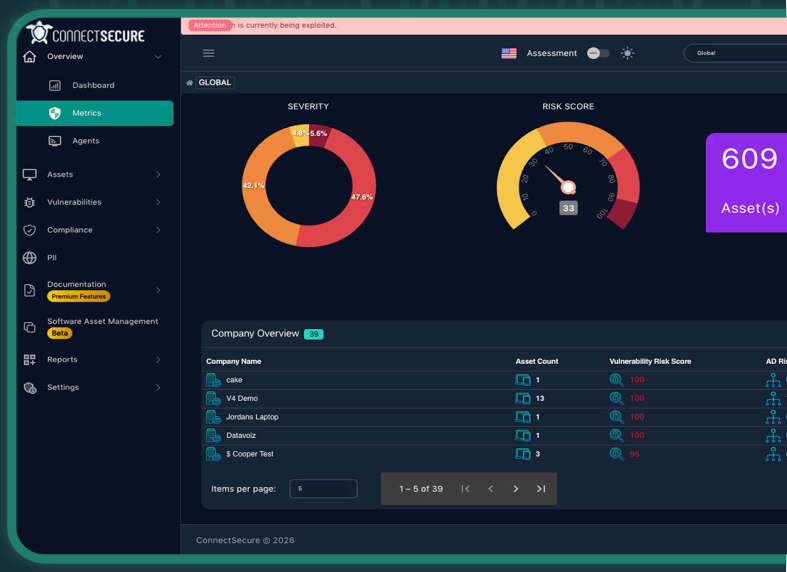
CONNECTSECURE

# Affordable Vulnerability, Patch, & Compliance Management for MSPs

*Find More. Do More.*



ConnectSecure is a multi-tenant vulnerability and compliance management scanning solution.

The platform combines comprehensive asset discovery and vulnerability detection with automated remediation, giving MSPs the power to proactively secure their clients IT infrastructure and minimize risk.

## See & Secure the Entire Attack Surface in One Platform

### IDENTIFY
Identify the entire attack surface.

### PATCH
Automated remediation prioritized by severity and exploitability.

### REPORT
Deliver white-labeled reports that support QBRs, audits, cyber insurance, and compliance initiatives.

### MONITOR
Track risk across every client environment from one centralized dashboard.

# Why Our Partners Choose ConnectSecure

### Complete Visbility Across Every Client

Discover and scan enpoints, servers, network devices, cloud apps, and Microsoft 365 from a single platform.

### Integrations Built for MSP Workflows

Over 30 native integrations with leading PSA, RMM, and IT management platforms, plus open API access.

### Automated Remediation with Less Manual Work

Automate patching and remediation across Windows, Linux, and 550+ third-party apps while prioritizing vulnerabilities based on exploitability, severity, and business impact.

### Client-Friendly White-Label Reporting

Generate client-ready reports that showcase security posture, remediation progress, and risk reduction over time.

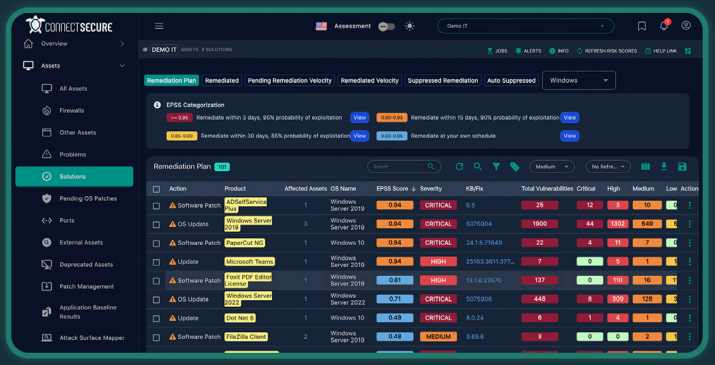
### Multi-Tenant Management with Access Controls

Manage all your clients from a single dashboard while maintaining company-specific controls, workflows, and role-based access for co-managed environments.

### Compliance Scanning & Assessments

Continuously assess environments against CIS, NIST, HIPPA, Cyber Essentials, and cyber essential frameworks.

# ConnectSecure Platform Features



- Asset Inventory and Tagging
- Continuous Vulnerability Management
- Active Directory and Entra ID Scanning
- External Asset Scanning
- Attack Surface Mapper
- Operating System Patching
- Third-Party Application Patching
- Cyber Risk Assessment
- Compliance Control Assessment
- Application Baseline Audit
- Cloud Assessments
- Web Application Scanning
- EPSS, CVSS, and CISA KEV Prioritization
- 80+ Pre-Built Dashboards
- 100+ Role-Based and White-Label Reports
- Scan, Patch, and Report Schedulers
- 30+ Integrations
- PII Scanning
- Software Asset Inventory
- Alerting
