

DATASHEET

Fortra's Cybersecurity Portfolio

Fortra® has transformed the industry by bringing leading solutions into one best-in-class portfolio, creating a stronger line of defense from a single provider. Our offerings are better together and give you the tools you need to meet the challenges of today's threat landscape head-on while achieving compliance. We're your cybersecurity ally.

Infrastructure Protection and Data Security

Information and infrastructure security are paramount to maintaining business continuity and adhering to compliance requirements in a rapidly changing threat landscape. Fortra blends flexibility with the latest capabilities and threat intelligence to empower you to protect data throughout its lifecycle; control identity and access management; and proactively test and safeguard networks, applications, servers, and related infrastructure.

Data Protection

Protect sensitive information across your enterprise with encryption and needs-based access to comply with regulatory requirements. Identify and classify data and root out violations of your organization's security policy by leveraging:

- Data Loss Prevention
- Data Classification
- Secure Collaboration

Secure File Transfer

Simplify, secure, and automate enterprise file transfer through a single intuitive interface that enables employees, partners, and customers to move data easily without the need for programming skills.

- Managed File Transfer (SFTP, HTTPS, PGP, etc.)
- Secure Email and Collaboration
- File Transfer Acceleration

Offensive Security

Identify and mitigate security risks by simulating real-world attack scenarios. Offensive security solutions and services are designed to help organizations understand their security posture, identify and validate potential weaknesses, and implement best practices for remediation.

- Automated Pen Testing
- Adversary Simulations and Red Team Operations

Security Awareness Training

Avoid data breaches and reduce risk by changing unsafe end user behaviors. With interactive, hands-on modules available in over 40 languages, every security awareness solution includes:

- eLearning Modules
- Phishing Simulation Templates
- Analytics And Data Reporting

Digital Risk Protection

Safeguard critical digital assets through expert-curated threat intelligence and complete mitigation against brand impersonation, data leakage, social media threats, account takeover, and other digital risks in one complete solution.

- Domain Monitoring
- Brand Protection
- Account Takeover Protection
- Social Media Protection

Vulnerability Management

Identify, evaluate, prioritize, and report on security weaknesses that may be putting your organization at risk. Easy to deploy, simple to use, and scalable, these solutions help streamline your security efforts.

- Vulnerability Management
- Web Application Scanning
- Integrity Monitoring
- Application Security Testing

Email Security and Anti-Phishing

Keep emails, brands, and data protected from BEC and phishing attacks. Reduce the chance of cyberattacks starting with malicious inbound email as well as outbound data loss prevention with these capabilities:

- DMARC Protection
- Cloud Email Security
- Secure Email Gateway

Managed Security Services

Partner with Fortra cybersecurity experts, who have the experience and resources to help you implement a multi-layered defense that protects your organization without disrupting business activity.

Extended Detection and Response

Expert-enabled XDR visibility that extends to every layer of your environment – endpoint, network, identity, and cloud – with 24/7 threat monitoring to quickly detect and respond to threats.

Managed Detection and Response

Reduce the likelihood and impact of a cyberattack with comprehensive coverage for public clouds, SaaS, on-premises, and hybrid environments, with 24/7 threat protection delivered by security experts.

Managed Web Application Firewall

Benefit from enterprise-level, cloud-ready, fully managed critical web application and API protection that comes with a team of experts to eliminate the complexity for you.
