**Acronis**<sup>\*</sup> Acronis sets the standard with its backup, disaster recovery, and secure file sync and share solutions. Powered by the Acronis AnyData Engine and more than 100 patents, it delivers easy, complete and affordable data protection across any environment — virtual, physical, cloud and mobile. More than 5 million consumers and 500,000 businesses in over 145 countries trust Acronis to protect their data. [www.acronis.com](http://www.acronis.com) *\*Brand sales specialist available*

**arcserve**<sup>\*</sup> As the world's most experienced provider of data protection solutions, Arcserve's roots in innovation run deep. Starting with the release of their first backup solution in 1988, Arcserve leverages their heritage to develop transformative technological solutions for any data protection need. Going beyond data protection alone, Arcserve takes a whole-business approach to protecting the time, money, and productivity of their customers by removing the complexity of backing up and restoring critical business data. Today, their award-winning solutions are used by organizations in more than 150 countries around the world. [www.arcserve.com](http://www.arcserve.com) *\*Brand sales specialist available*

**Bitdefender**<sup>\*</sup> Whether your customers need protection for a single device, a smart home, their small business, hybrid infrastructure or Enterprise datacenter, Bitdefender has the product that delivers the best security, unparalleled performance and incredible ease of use. Unlike traditional vendors patching together pre-virtualization and pre-cloud Windows applications, Bitdefender GravityZone combines all the security services organizations need into a single delivery platform to reduce their cost of building a trusted environment for all endpoints. [www.bitdefender.com](http://www.bitdefender.com) *\*Brand sales specialist available*

**BlackBerry**<sup>®</sup> BlackBerry provides a single platform for securing, managing, and optimizing how intelligent endpoints are deployed in the enterprise, enabling customers to stay ahead of the technology curve that will reshape every industry. [www.blackberry.com](http://www.blackberry.com)

**CARBONITE**<sup>®</sup> + **WEBROOT**<sup>®</sup> An OpenText Company. Not so long ago, we used to protect important documents with a carbon copy. Then, computers came along. And we started losing data left and right. Now, whether your data lives on a computer, a server or in the cloud, Carbonite helps keep it safe from the common causes of data loss.

In 2019, Webroot and its parent company Carbonite were acquired by OpenText, a global leader in Enterprise Information Management. Together, we are a market leader in cyber resilience, offering total endpoint protection and disaster recovery for any sized business. [www.opentext.com](http://www.opentext.com) [www.carbonite.com](http://www.carbonite.com)

**CyberRes**<sup>\*</sup> CyberRes is a product line of Micro Focus, one of the largest pure-play software companies in the world, including brands from heritage HPE Software, NetIQ, Novell and Attachmate. In the world of Security, CyberRes offers portfolios of solutions in Application Security, Data Privacy and Protection, Identity and Access Management and Security Operations. Each solution is intended for modern hybrid clouds, and each is embedded with machine learning. Micro Focus helps customers bridge the old and the new by maximizing the ROI on existing software investments and enabling innovation in the new hybrid model for enterprise IT. [www.cyberes.com](http://www.cyberes.com)

## DNS Filter

DNS Filter is the most accurate threat detection and content filtering tool on the market today. Detecting threats up to 7 days sooner than other solutions, DNS Filter has flexible deployment options, including Roaming Clients for all O/S, and Active Directory integration. DNS features fit any organization, whether you are fully remote, hybrid, or in office. <https://www.dnsfilter.com/>

## Delinea

**arcserve**<sup>®\*</sup> As the world's most experienced provider of data protection solutions, Arcserve's roots in innovation run deep. Starting with the release of their first backup solution in 1988, Arcserve leverages their heritage to develop transformative technological solutions for any data protection need. Going beyond data protection alone, Arcserve takes a whole-business approach to protecting the time, money, and productivity of their customers by removing the complexity of backing up and restoring critical business data. Today, their award-winning solutions are used by organizations in more than 150 countries around the world. [www.arcserve.com](http://www.arcserve.com) *\*Brand sales specialist available*

**CARBONITE**<sup>®</sup> + **WEBROOT**<sup>®</sup> — opentext<sup>®</sup> Security Solutions — An OpenText Company. Not so long ago, we used to protect important documents with a carbon copy. Then, computers came along. And we started losing data left and right. Now, whether your data lives on a computer, a server or in the cloud, Carbonite helps keep it safe from the common causes of data loss.

In 2019, Webroot and its parent company Carbonite were acquired by OpenText, a global leader in Enterprise Information Management. Together, we are a market leader in cyber resilience, offering total endpoint protection and disaster recovery for any sized business.

**DATA CORE**<sup>™</sup> The Authority on Software-Defined Storage. DataCore SDS eliminates hardware and vendor lock-in, giving IT departments maximum flexibility — while making storage smarter, more efficient, and highly available. [www.datacore.com](http://www.datacore.com)

**Datadobi** Enterprise-class software to migrate and protect unstructured data anywhere. Datadobi provides solutions to ease unstructured data mobility. Their DobiMiner Software Suite allows customers to migrate, copy, replicate, restore, and failover file and object data between heterogeneous or in-family NAS, file-system, and object storage on-premises or in the cloud. Their DobiMiner Software Suite — DobiMigrate, DobiReplicate, and DobiSync — provides the safest, fastest, easiest, and most cost-effective way to ensure your customers' file and object data is always available. [www.datadobi.com](http://www.datadobi.com)

**DNS Filter** DNS Filter is the most accurate threat detection and content filtering tool on the market today. Detecting threats up to 7 days sooner than other solutions, DNS Filter has flexible deployment options, including Roaming Clients for all O/S, and Active Directory integration. DNS features fit any organization, whether you are fully remote, hybrid, or in office. <https://www.dnsfilter.com/>

**Macrium Software**<sup>\*</sup> Macrium Software designs solutions to protect the most valuable asset in the world — your data. They're dedicated to creating dependable software, providing quality service, and maintaining superior relationships with our customers and partners. Macrium loves what they do and takes pride in their success. Macrium offers the complete backup and disaster recovery solution for home and business. Macrium's proactive approach creates security in an uncertain world. From small businesses to global enterprises, our products are fast, reliable and scalable.

You're looking to streamline and grow your MSP business. N-able offers a robust, integrated solution set to monitor, manage, and protect your customers—and scale your team's time and talent. Use their partner resources to upskill teams, expand into new service areas, and get the support you need. Tap into automation and best practices to drive your productivity and efficiency to new levels. Growth, accelerated. [www.n-able.com](http://www.n-able.com) *\*Brand sales specialist available*

Unitrends increases uptime, productivity, and confidence in a world in which IT professionals must do more with less.

Their all-in-one backup appliances simplify data protection, application spin-up, and SLA policy auto-mation. Seamless integration with the cloud delivers long-term retention and fast disaster re-recovery. The old way to backup forces customers to manually integrate software, analytics, de-duplication, hardware, and cloud. Unitrends eliminates backup complexity and stress with all-in-one enterprise backup and continuity. [www.unitrends.com](http://www.unitrends.com) *\*Brand sales specialist available*

The VAST Data Platform is a breakthrough approach to data-intensive computing that serves as the comprehensive software infrastructure required to capture, catalog, refine, enrich, and preserve data through real-time deep data analysis and deep learning. Built from the ground up as a Disaggregated and Shared-Everything (DASE) all-flash architecture, VAST Data is specifically engineered to make flash affordable for all your applications. [www.vastdata.com/](http://www.vastdata.com/)

Wasabi is at the core of your enterprise-ready business cloud. For many companies, migrating their data to the cloud is a necessity, but with Wasabi it's also an opportunity. An opportunity to choose a bottomless cloud of storage that's 1/5 the cost of AWS S3 and faster than the competition. Whether you need a second copy in the cloud, off-site disaster recovery, an active and accessible data archive, or long term storage, Wasabi's breakthrough price-performance makes the choice simple. One price. Lightning fast speed. No hidden fees. Wasabi hot cloud storage for all your data needs. [www.wasabi.com](http://www.wasabi.com) *\*Brand sales specialist available*

 **CLOUDIAN**<sup>®</sup> File and Object Storage Solutions Solve your biggest capacity storage challenges. Cloudian<sup>®</sup> file and object storage solutions are powerful and easy to use. Proven with enterprise applications worldwide, you get infinite scalability and limitless possibilities. [www.cloudian.com](http://www.cloudian.com)

 **SUPERMICR**<sup>®</sup> Supermicro is a global leader in high performance, high efficiency server technology and innovation. They develop and provide end-to-end green computing solutions to the data center, cloud computing, enterprise IT, big data, high performance computing, or HPC, and embedded markets. [www.supermicro.com](http://www.supermicro.com)

**Tintri**

Tintri's file system — the foundation of any storage system — was built by the team that created ESX server. They have removed the constraints of legacy storage — no LUNs, volumes, block protocols, and more. They have a deeper understanding of, and deeper integration with, customers' entire virtualization ecosystem. And so only Tintri can Automate across their infrastructure, predict every need 18 months into the future, speed up development and test cycles, see inside every individual virtual machine, guarantee performance for every application, and recover data in seconds to avoid disaster. [www.tintri.com](http://www.tintri.com)
