Acronis^{*} Acronis sets the standard with its backup, disaster recovery, and secure file sync and share solutions. Powered by the Acronis AnyData Engine and more than 100 patents, it delivers easy, complete and affordable data protection across any environment — virtual, physical, cloud and mobile. More than 5 million consumers and 500,000 businesses in over 145 countries trust Acronis to protect their data.
www.acronis.com **Brand sales specialist available*

 **AppOmni** AppOmni protects more than 76 million users on SaaS platforms and has secured more than 230 million exposed data records. *Secure Your SaaS Data* Our comprehensive platform makes it easy for security and IT teams to protect and monitor their entire SaaS environment, from each vendor to every end-user. www.appomni.com

arcserve^{®*} As the world's most experienced provider of data protection solutions, Arcserve's roots in innovation run deep. Starting with the release of their first backup solution in 1988, Arcserve leverages their heritage to develop transformative technological solutions for any data protection need. Going beyond data protection alone, Arcserve takes a whole-business approach to protecting the time, money, and productivity of their customers by removing the complexity of backing up and restoring critical business data. Today, their award-winning solutions are used by organizations in more than 150 countries around the world. www.arcserve.com **Brand sales specialist available*

BEYOND IDENTITY

Invisible Multi-Factor Authentication: Think DUO, but easier to use and more secure. Eliminate ransomware and account takeovers. Stop 80% of breaches that start with passwords. Invisible strong authentication. Security without friction. No passwords, no one-time codes, no user actions or second devices required. Just three unphishable factors. www.beyondidentity.com

Bitdefender^{®*} Whether your customers need protection for a single device, a smart home, their small business, hybrid infrastructure or Enterprise datacenter, Bitdefender has the product that delivers the best security, unparalleled performance and incredible ease of use. Unlike traditional vendors patching together pre-virtualization and pre-cloud Windows applications, Bitdefender GravityZone combines all the security services organizations need into a single delivery platform to reduce their cost of building a trusted environment for all endpoints. www.bitdefender.com
**Brand sales specialist available*

 **CARBONITE**[®] +  **WEBROOT**[®] An OpenText Company. Not so long ago, we used to protect important documents with a carbon copy. Then, computers came along. And we started losing data left and right. Now, whether your data lives on a computer, a server or in the cloud, Carbonite helps keep it safe from the common causes of data loss.

In 2019, Webroot and its parent company Carbonite were acquired by OpenText, a global leader in Enterprise Information Management. Together, we are a market leader in cyber resilience, offering total endpoint protection and disaster recovery for any sized business. www.opentext.com www.carbonite.com

CyberRes^{*} CyberRes is a product line of Micro Focus, one of the largest pure-play software companies in the world, including brands from heritage HPE Software, NetIQ, Novell and Attachmate. In the world of Security, CyberRes offers portfolios of solutions in Application Security, Data Privacy and Protection, Identity and Access Management and Security Operations. Each solution is intended for modern hybrid clouds, and each is embedded with machine learning. Micro Focus helps customers bridge the old and the new by maximizing the ROI on existing software investments and enabling innovation in the new hybrid model for enterprise IT. www.cyberes.com

CYREBRO CYREBRO is the core of your company's cybersecurity, providing a first-of-its-kind managed SOC Infrastructure. You are secured with enterprise-grade security no matter the size of your business; ensuring fast and effective incident response, 24/7/365 monitoring, mitigation of cyber threats, and proactive threat intelligence. www.cyrebro.io

Delinea Delinea's cyber security software prevents attacks by securing passwords, protecting endpoints, and controlling access. www.delinea.com

ExtraHop Your customers deserve full visibility into all tiers of their IT environment, as well as the insights that lie untapped in their wire data—insights that can help them increase security, drive down costs, optimize efficiency, and improve end-user experience. ExtraHop exists to help customers fully access their wire data and uncover those insights. It really is that simple. www.extrahop.com

flexera Flexera gives companies clarity into their technology "black hole," helping business leaders turn IT insight into action. With a portfolio of integrated solutions that deliver unparalleled technology insights and agility, Flexera helps enterprises realize IT's full potential to accelerate their business. www.flexera.com

See every bit, byte, and packet^{*}

Designing the industry's first bypass test access point (TAP) is just one of the many benchmarks for success, and since 2011, Garland Technology has accelerated research and development, alongside a commitment to product evolution and quality, to become the leader for the industry's most reliable test access point (TAP) and packet broker solutions. www.garlandtechnology.com

GFI Software^{*} GFI's goal is to provide businesses with all the solutions needed to effectively discover, manage and secure their IT environment. GFI provides web and mail security, archiving, fax, networking and security software. They will keep pace as your customers' businesses grow. And they're always making their business solutions even better. www.gfi.com **Brand sales specialist available*

Illumio enables organizations to realize a future without high-profile breaches by providing visibility, segmentation, and control of all network communications across any data center or cloud. www.illumio.com

imperva^{*} Imperva is a leading provider of data and application security solutions that protect business-critical information in the cloud and on-premises. Imperva protects cloud applications, websites and applications, files, SharePoint systems, databases and big data repositories from both theft and extortion attacks. Their technology provides visibility into how users access data and applications and uses sophisticated user tracking and classification to detect and block cyberattacks, botnets, unauthorized users and malicious insiders. www.imperva.com **Brand sales specialist available*

Invicti  Invicti Security is transforming the way web applications are secured. An AppSec leader for more than 15 years, Invicti enables organizations in every industry to continuously scan and secure all of their web applications and APIs at the speed of innovation. Invicti provides a comprehensive view of an organization's entire web application portfolio, and powerful automation and integrations enable customers to achieve broad coverage of even thousands of applications. Invicti is headquartered in Austin, Texas, and serves more than 3,500 organizations of all sizes all over the world. For more information, visit our website. www.invicti.com

 **IRONSCALES**
SAFER TOGETHER Defending against today's advanced threats requires a new approach to email security. IRONSCALES' best-in-class email security platform is powered by AI, enhanced by thousands of customer security teams and is built to detect and remove threats in the inbox. We offer a service that is fast to deploy, easy to operate and is unparalleled in the ability to stop all types of email threats, including advanced attacks like BEC, ATO and more. www.ironcales.com

 **LOGICGATE** LogicGate Risk Cloud® is a no-code governance, risk, and compliance (GRC) platform that scales and adapts to your changing business needs and regulatory requirements. It provides solutions for every GRC use case from one integrated platform to help you build, evolve, and communicate a market-leading risk strategy and program. www.logicgate.com

 **LogRhythm**[™] LogRhythm is a world leader in NextGen SIEM, empowering successfully reduce risk by rapidly detecting, responding to and neutralizing damaging cyberthreats. The LogRhythm platform combines user and entity behavior analytics (UEBA), network traffic and behavior analytics (NTBA) and security automation & orchestration (SAO) in a single end-to-end solution. www.logrhythm.com

 **Malwarebytes** MSP program designed to foster meaningful, profitable relationships using our award-winning, Malwarebytes Nebula platform, and OneView MSP management console. Your organization can offer easy access to the best-in-class endpoint security services your business customers demand. www.malwarebytes.com

 **N-ABLE**^{™*} You're looking to streamline and grow your MSP business. N-able offers a robust, integrated solution set to monitor, manage, and protect your customers—and scale your team's time and talent. Use their partner resources to upskill teams, expand into new service areas, and get the support you need. Tap into automation and best practices to drive your productivity and efficiency to new levels. Growth, accelerated. www.n-able.com **Brand sales specialist available*

proofpoint® Proofpoint is a Global Leader in the Email Security and Cybersecurity space. Proofpoint Essentials is a cloud-based multi-tenant solution designed for MSP's, providing complete defense against today's advanced email threats. The service is backed by Proofpoint's market-leading security technology that is currently protecting more than 80% of Fortune 100 Companies. Partners can now offer customers Enterprise class email protection from business email compromise (BEC), ransomware, phishing, malware, spam, as well as protection beyond the inbox by offering features including data loss prevention, social media protection, custom policy based email filtering, enforced email encryption, archiving and more. www.proofpoint.com

 **SALT SECURITY** Only Salt delivers the context you need to protect your APIs. The Salt Security API Protection Platform secures the APIs at the heart of all your modern applications. Our API Context Engine (ACE) architecture discovers all your APIs, stops attackers, and shares insights to improve your API security. www.salt.security

 **SecurityScorecard** Security Scorecard is a powerful tool used to discover and remediate your IT Infrastructure risk as well as cyber security risk in your vendor and business partner environment. Work collaboratively with third parties to reduce risk and improve security posture. Accurate security ratings, advanced data analytics, and actionable insights. www.securityscorecard.com

 **SOLARWINDS**^{*} SolarWinds provides purpose-built products that are designed to make jobs easier for IT professionals, MSPs, and DevOps pros. Solarwinds offers value-driven products and tools that solve a broad range of IT management challenges related to networks, servers, applications, storage, virtualization, cloud, or development operations. Whether you're an MSP responsible for multiple customers, or whether you're a reseller whose customer is an army of one managing a small environment, part of an IT team managing an enterprise, or they've migrated to the cloud — SolarWinds has powerful, easy-to-use, and affordable products to help them manage their IT performance. www.solarwinds.com **Brand sales specialist available*

 **sonatype** Sonatype is a developer-friendly full-spectrum software supply chain management platform helps more than 1,500 organizations and 15 million software developers simultaneously accelerate innovation and improve application security. Their machine learning engine (Nexus Intelligence) has analyzed more than 100 million open source components. Sonatype continuously feeds this intelligence to customers so they make better innovation decisions early and everywhere across their development lifecycle. Code smarter. Fix faster. Be secure. www.sonatype.com

SOPHOS^{*} Sophos began producing antivirus and encryption products nearly 30 years ago. Today Sophos' products help secure the networks used by 100 million people in 150 countries and 100,000 businesses, including Pixar, Under Armour, Northrop Grumman, Xerox, Ford, Avis, and Toshiba. As IT networks grow in complexity, Sophos is focused on keeping IT security simple and reliable. They know that a proper security strategy must include networks, servers and devices — all devices — managed easily through the cloud. www.sophos.com **Brand sales specialist available*

DATA CORE[™] The Authority on Software-Defined Storage. DataCore SDS eliminates hardware and vendor lock-in, giving IT departments maximum flexibility — while making storage smarter, more efficient, and highly available. www.datacore.com

Datadobi Enterprise-class software to migrate and protect unstructured data anywhere. Datadobi provides solutions to ease unstructured data mobility. Their DobiMiner Software Suite allows customers to migrate, copy, replicate, restore, and failover file and object data between heterogeneous or in-family NAS, file-system, and object storage on-premises or in the cloud. Their DobiMiner Software Suite — DobiMigrate, DobiReplicate, and DobiSync — provides the safest, fastest, easiest, and most cost-effective way to ensure your customers' file and object data is always available. www.datadobi.com

LIQID Liquid composable infrastructure frees IT users from vendor lock-in and traditional purchasing cycles enabling them to build a living data center architecture that changes to meet their business needs and scales as needed. All of this while offering powerful improvements in data performance, architectural optimization, hardware disaggregation, and footprint efficiency. www.liqid.com

 **Macrium Software**^{*} *It's our business to protect your data* Macrium Software designs solutions to protect the most valuable asset in the world — your data. They're dedicated to creating dependable software, providing quality service, and maintaining superior relationships with our customers and partners. Macrium loves what they do and takes pride in their success. Macrium offers the complete backup and disaster recovery solution for home and business. Macrium's proactive approach creates security in an uncertain world. From small businesses to global enterprises, our products are fast, reliable and scalable.

 **N-ABLE**^{*} You're looking to streamline and grow your MSP business. N-able offers a robust, integrated solution set to monitor, manage, and protect your customers—and scale your team's time and talent. Use their partner resources to upskill teams, expand into new service areas, and get the support you need. Tap into automation and best practices to drive your productivity and efficiency to new levels. Growth, accelerated. www.n-able.com **Brand sales specialist available*

 **UNITRENDS**^{*} A Kaseya COMPANY Unitrends increases uptime, productivity, and confidence in a world in which IT professionals must do more with less. Their all-in-one backup appliances simplify data protection, application spin-up, and SLA policy auto-mation. Seamless integration with the cloud delivers long-term retention and fast disaster re-recovery. The old way to backup forces customers to manually integrate software, analytics, de-duplication, hardware, and cloud. Unitrends eliminates backup complexity and stress with all-in-one enterprise backup and continuity. www.unitrends.com **Brand sales specialist available*

 **wasabi**^{*} hot cloud storage Wasabi is at the core of your enterprise-ready business cloud. For many companies, migrating their data to the cloud is a necessity, but with Wasabi it's also an opportunity. An opportunity to choose a bottomless cloud of storage that's 1/5 the cost of AWS S3 and faster than the competition. Whether you need a second copy in the cloud, off-site disaster recovery, an active and accessible data archive, or long term storage, Wasabi's breakthrough price-performance makes the choice simple. One price. Lightning fast speed. No hidden fees. Wasabi hot cloud storage for all your data needs. www.wasabi.com **Brand sales specialist available*

 **CLOUDIAN**[®] File and Object Storage Solutions Solve your biggest capacity storage challenges. Cloudian[®] file and object storage solutions are powerful and easy to use. Proven with enterprise applications worldwide, you get infinite scalability and limitless possibilities. www.cloudian.com

 **SCALE** COMPUTING Scale Computing is a leader in edge computing, virtualization, and hyperconverged solutions. Their highly automated infrastructure, virtualization platform, & hyper-converged solutions support their customers IT infrastructure needs. www.scalecomputing.com

 **SEAGATE**^{*} Seagate Technology has been a global leader offering data storage and management solutions for over 40 years. Seagate creates precision-engineered data storage technologies that deliver high-capacity, speed, reliability, and performance. www.seagate.com **Brand sales specialist available*

Lyve™ Mobile from Seagate® is a high-capacity edge storage solution that enables businesses to aggregate, store, move, and activate their data. Scalable, modular, and vendor agnostic, this integrated solution eliminates network dependencies so you can transfer mass data sets in a fast, secure, and efficient manner. With on-demand consumption delivered as a service, you order and pay only for the devices you need, when you need them. www.seagate.com/products/cloud/lyve-mass-storage-platform *Brand sales specialist available

Supermicro is a global leader in high performance, high efficiency server technology and innovation. They develop and provide end-to-end green computing solutions to the data center, cloud computing, enterprise IT, big data, high performance computing, or HPC, and embedded markets. www.supermicro.com

Tintri's file system — the foundation of any storage system — was built by the team that created ESX server. They have removed the constraints of legacy storage — no LUNs, volumes, block protocols, and more. They have a deeper understanding of, and deeper integration with, customers' entire virtualization ecosystem. And so only Tintri can Automate across their infrastructure, predict every need 18 months into the future, speed up development and test cycles, see inside every individual virtual machine, guarantee performance for every application, and recover data in seconds to avoid disaster. www.tintri.com
